

Reference letter

JIVO

Sergey worked at Jivo for about 1 year, from August 2022 till July 2023, as "Node.js Developer". During this time he took part in several high-payload projects, most of the time developing the messaging service. Actively participated in developing the architecture of the whole chat-platform, code base refactoring, peer code review and preparation of releases. Showed a good command of theoretical knowledge, deep understanding of Node.js, applied the knowledge in practice. Able to independently design a technical solution, assess risks and peculiarities of implementation options, choose the best one and prepare arguments. Demonstrated an ability to efficiently organize his work time: correctly evaluated complex tasks, completed them with high quality and on time. Sergey is proactive, quick to learn, and keeps his attention on feedback. He proved himself as a responsible and engaged professional. I can recommend Sergei for cooperation.
